KITCHEN CALL - LP6 – Radio paging system

This compact, highly practical system offers multiple radio paging solutions and is ideal for hotels, leisure centres, pubs and clubs, retail outlets, supermarkets, industrial sites, offices, nursing and care applications.

The system is very simple to install and operate and comprises of a desktop transmitter with tone and vibrating radio pagers. Vibrate only may be supplied as an option.

The transmitter is equipped with a keypad that enables simple selection of paging options. Up to 99 individual pagers can be used simultaneously. To call pager number 21 for example, key in 21, press transmit. Pager 21 then responds with a tone and vibrate alert, this operates for seven seconds then automatically stops.

The rated operating range is 50m with signal repeater/boosters available for larger venues increasing the range by a further 50m. Up to five repeater/boosters can be employed on one system.

EQUIPMENT CONFIGURATION

Single system for use in a building. (for use by customers)

Typical use in a restaurant to page customers when their table is ready. They are issued with a pager labelled with their table number. The restaurant manager, when the table is ready, simply keys in the table number then presses the transmit button. The customer's pager responds to indicate that their table is ready. This gives them the freedom to wait at the bar or elsewhere.

Multiple systems in a building. (for use as a kitchen call system)

The transmitter is located in the kitchen (the keypad is splash proof). When a waiter is required in the kitchen simply select the corresponding number and their pager will summon them to the kitchen. This makes a totally organised system for paging customers and making sure the waiting staff know when the meal is ready to be served.

Pagers are rechargeable and are supplied with a charger. Transmitters operate from 12 Volt DC power adaptor (supplied) and are fitted with a backup battery. Transmitters and pagers are available separately or a four-pager kit is available.

Specifications:

Keypad transmitter:

Dimensions L 120mm W 103mm D 25mm
Weight 177g (including backup battery)
Frequency 433.925 MHz
Splash proof Keypad
Simple Selection
Supports up to 99 pagers (1 – 99)
LED indication of selection and transmission
AC adapter included
Battery Back up

Pager:

L 95mm H 55mm W 18mm
Weight including battery 102g.
Tone and Vibrate
7-second timer
Belt Clip
Rechargeable Battery
LED Indicator

The Kitchen Call Kit including 4 pagers along with their charger unit, the Kitchen Call transmitter and its power supply and full instructions - £325 + VAT and carriage, typically £10.
