

LynxPro MAXPage

LynxPro MAXPage is an advanced, alphanumeric, desktop paging system that offers many unique features as standard. With a capacity for 1000 pagers, 2 - 4 watt transmitter using UHF frequencies, durable injection molded enclosure, backlit 32 character LCD & a backlit telephone style key pad,

LynxPro MAXPage is a complete, ready to use paging terminal that is simple to install and operate **LynxPro MAXPage** allows you to send paging messages or alert patrons free of charge*. There are no monthly access fees* or per-message charges.

No Monthly Pager Fees

With **LynxPro MAXPage** you never pay monthly fees. You own the pagers and the paging system and can send as many messages as you want without paying. With a built in UHF transmitter, giving you up to 1 mile range, a capacity for 1000 pagers and 20 pager groups, **LynxPro MAXPage** is an ideal solution for all your requirements.

Easy Text Messaging

Sending alphanumeric text messages couldn't be easier and means your staff don't have to place a call to find out what the code was for, saving time and money. Save even more time by using the dual-mode function keys to store up to 8 commonly used messages.

Send Messages From Anywhere

Everyone in the building can have easy access to the **LynxPro MAXPage** system through its telephone interface. Once the system is plugged into a telephone port, anyone can pick up any telephone extension, dial the **LynxPro MAXPage** unit and use the buttons on their phone to send messages to pagers.

The system requires an annual Radio Licence fee.

Software

Configuration and message dispatch couldn't be any easier. By connecting a PC to **LynxPro MAXPage** and, using the Windows® interface, pagers, groups, alarms, settings, coasters and reminders can all be managed at the click of a mouse.

Keyboard

LynxPro MAXPage has an optional keyboard port. Simply plug in any standard PS2 keyboard allows easy dispatch of alphanumeric messages and makes system configuration a breeze – without the need for a PC.

Alarm Monitoring

A powerful feature of **LynxPro MAXPage** is it's on board alarms. The four, dry contact closure, onboard alarm inputs will automatically dispatch messages to pagers or groups when activated. Alarms not cleared within a configured time frame can activate a repeat message to either the same pager/group or to an alternative pager/group. This simple yet powerful feature provides a low cost alarm monitoring solution that can be used in a variety of applications.

Serial Interface

LynxPro MAXPage also includes a serial port, which can be used to receive and relay messages from any device that sends messages in the TAP, Scope™ or Comp protocols. **LynxPro MAXPage** seamlessly transmits these messages as they arrive.
